TEAMSTERS LOCAL 817

One Local.
One digital front door.

A modern official website with Driver Hub connected as a practical member resource.

Website concept for leadership review October 19, 2026

THE MEMBER EXPERIENCE

Find what you need. Get back to work.

Bring the union's information and everyday tools into one clear, phone-friendly experience. Preserve the official content and working services while making them easier to find.

01

Every craft has a place

Transportation, Casting, Commercial Locations, and TV/TH Locations each get a clear pathway.

02

Member actions come first

Pay dues, open SHAPE, find forms and agreements, or contact the hall without hunting through pages.

03

Driver Hub belongs in the journey

A protected entry connects guides, locations, vehicle references, and practical driving information.

04

Information earns trust

Dated news, current-versus-archived events, accessible navigation, and documents with clear ownership.

EXISTING TODAY

Official Local 817 pages, payment and member portals, plus the separately protected Driver Hub.

PROPOSED IN THIS CONCEPT

One design and navigation system. A shared login and a domain move are later decisions, not live features.

Separate preview only. No changes to the official site or Driver Hub.

A PRACTICAL PATH TO LAUNCH

Modernize in stages.

Leadership sets the rules. The website makes them easier to use.

1

Verify the content and preserve every useful route.

Assign a content owner to each craft and department. Confirm policy, agreement, dues, and benefit information; inventory links and files; preserve working destinations and plan redirects.

2

Connect the protected Driver Hub first.

Add a consistent Driver Hub doorway to the official-site experience while keeping its existing access checks. Retain the current payment, SHAPE, forms, and account workflows.

3

Evaluate deeper integration after review.

Review membership verification, roles, privacy, provider capabilities, and security before any shared sign-in or same-domain integration. Then migrate in approved stages and test access.

DECISIONS TO RESOLVE BEFORE MIGRATION

- **Applications:** Transportation says CLOSED alongside an October 7, 2026 temporary-process notice. Approve one dated status.
- **Agreements and amounts:** Commercial Locations mixes 2025-2027 and 2021-2024 references. Verify dues and benefits against approved changes.
- **Dates and history:** 2025 events remain under Upcoming; a September 2026 meeting is past. Standardize history around the 1926 founding.
- **Ownership and privacy:** A production post is dated 2025 with an Oct2026 file label; a member-list discussion is publicly readable. Set version and access rules.

REQUESTED NEXT STEP

Approve the concept direction and name departmental reviewers.
Use the preview to agree on content, access, and priorities before production work.

PUBLIC PREVIEW

frankbjj23.github.io/local817-proposal/

Leadership-review concept; not an endorsed union release.

Concept, graphic design and site development: Frank Smith III
Driver Hub source collection: Chad Leach, with fellow contributors.
